

Title:

Effect of Vibration on Water Molecule, and Hado (vibration) Water on Human Body

- by means of Loyalty of Water for Harmony and Freedom -

Abstract:

Human body is made up of as many as 60 trillion cells. Our body is the harmony played by these cells. The harmony of good vibration, frequency, and sound can reach each and every cell of our body and thus contribute to our health. Michiko Hayashi from Japan and Akiko Stein from Germany who did experiments in our respective institutes will give presentations jointly.

Michiko will share how Solfeggio frequency, 528 Hz, affected water molecule through her experiments with water crystal photography. Developments in brain science research have shown that certain frequencies can relax human mental states. Solfeggio frequency 528Hz has been used by biochemists because of its DNA repair effect. The frequency of 528Hz appears to influence the water molecules that surround the DNA helix, thereby bringing about healing effects on DNA. Michiko will share how water reacts to the frequency of 528Hz as we play tuning fork to water.

Akiko will show her thought about the loyalty of water. Water is always waiting for coming, given impulse driven or expressed as vibrating information or we could say for that-- the information of light ---, visible and invisible. The form of their expression are chemical, electrical or/and magnetic, because as we know - every vibration carries information inside and have always effect on surrounding. Vibration means movement and Movement means Life. Living creature are always sending out somehow light. Water is very loyal, because water is always adjusting and expressing its own ability and potential for formation, which is transformation. This attitude of water is timeless, sacred, constant. It expresses for her eyes nothing but the Loyalty of Water. Akiko will share some interesting results of experiments, she has done, in order to show how different information can react directly on water and its structure, but also at the same time indirectly on our body and water inside and around us.. She tested the liquid in our body, saliva and water we drink with or without specific information inside.

From this experiment she will propose some ideas for the vitality, harmony and health in our daily life. What can we do as individual in every single day? and what does water do for us all creation in this universe? it goes about how everything can be connected and related each other through the medium Water.

We both are very happy to present our message as a joint presentation. May the deep and hidden message of Water reach you and your heart.

with Love and Gratitude

Michiko Hayashi

Akiko Stein
