

Vladimir Leonidovich Voeikov. Ph.D., Dr. habil. (biophysics, physiology), Professor and Vice-Chairman of the Chair of Bioorganic Chemistry, Faculty of Biology, Lomonosov Moscow State University (v.l.voeikov@gmail.com).

Winner of the Prize from Benveniste Association, the recipient of the Prigogine Gold Medal established by the University of Siena and the Wessex Institute of Technology. Associate Editor of "WATER: A Multidisciplinary Research Journal". The author and co-author of more than 300 publications, including about 100 papers published in International and Russian scientific journals and proceedings of congresses, conferences and symposia, of 5 books and monographs, of 20 patents. The participant of all Conference on the Physics, Chemistry and Biology of Water.

V.L.Voeikov is renowned in the field of physical and chemical properties of aqueous systems providing their key role in vital processes in living systems, evaluation of the functions of water and water-born reactive oxygen species in bioenergetics.
