

Short Bio for Water Conference 2024

Dr. Paul Héroux is a scientist with experience in physics (BSc, MSc and PhD), engineering (15 years), and the health sciences (37 years).

Following his basic science and engineering formation, he became interested in public health research, and was appointed Associate Professor at McGill University's Faculty of Medicine as well as Medical Scientist in the Department of Surgery, McGill University Health Center. He is currently the director of the Occupational Health program within the Department of Epidemiology, Biostatistics and Occupational Health, which is part of McGill's School of Population and Global Health. He teaches *Principles of Toxicology*, *Health Effects of Electromagnetism*, and *Hearing Conservation* at the Faculty of Medicine.

Dr. Héroux has performed contract research for electrical utilities (Institut de Recherche d'Hydro-Québec, Canadian Electrical Association, US Electric Power Research Institute) as well as for telecommunications companies (Nortel, Siemens).

Dr. Héroux was a member of New Hampshire's Commission to Study the Environmental and Health Effects of Evolving 5G Technology (2019-2020).

Dr. Héroux is a Commissioner (since 2022) and Vice-Chair of the International Commission on the Biological Effects of Electromagnetic Fields
